MAKstorm PRISMATIC SCOPE 4X30i HD

PN 1400503

Our history is rooted in the objective optics mounting solutions. Long years of experience and development Betser in this area and the challenges of our customers spurred us our activities in the field of optical systems to expand. Target optics camera systems and night vision and thermal imaging systems, as well as special solutions for the requirements of the authorities and hunters who are now our passion. To meet the high demands of our customers, our qualified staff are highly motivated and set a best materials and the latest production technologies. From this perfect harmony of all processes absolutely recurring precise target optics montages created with the highest precision and functionality.

The perfect assembly connecting the weapon to the target optics for successful hunting unentbehrlich. Unsere mounting solutions you provide exactly this perfection.

Parallel to our target optic assemblies and camera systems, we produce hunting and Sportwaffen- accessories, as well as products for upgrading weapons.

We work very closely with renowned weapons and optics manufacturers. This allows us to meet the future needs of our customers in connection with the latest product developments. The full satisfaction and the hunting, sporting, or use our customers' success is our goal. For the purpose of continuous development , we have expanded our work areas in recent years and use our innovative strength and experience under the umbrella of the MAK Group for the authorities the market for which we maintain with the name of MKEU a special distribution for MKE weapons in Europe . The MAK Savunma in Turkey , we have a bridge from Europe to Turkey . As the exclusive partner for well-known manufacturers , we sell quality products there of government agencies , as well as the hunting market .

MAK offers you technical products stock blanks own production of Turkish walnut.

We maintain one of the highest quality and largest stem Lumberyard Europe . You have the option to choose your individual stock wood with us from our fundus .

Gladly , our experts are available for your consultation.

Always at the service of our customers, we thank you for the many years of trust .

49,0 mm	12,0 mm	1630-7026

- . This mount can be installed on every type of rifle, either bolt action, or drop barrel.
- . The distance between the pivot and the lock is completely adjustable, because the complete rear foot can be slid front and back by opening one screw, which is very practical and revolutionary.
- . The height on the height spacers can also be adjusted with a modular system for the height spacer , which is also very elegant, practical, and revolutionary. (The height spacer is divided into smaller height steps, by means of this system we can change height without any machine work).
- . Without tension, for everything is adjustable.
- . Extremely stable, and recoil proof for all calibers.
- . The scope can be detached very easily and swiftly, without any tools.
- . A large bearing area on the pivot and the lockup.
- . No impact change after taking the scope off, and putting it back on.
- . The ideal mount for a second scope on the same rifle, or the same scope on multiple rifles.
- . A very elegant, and stable mount.

MAKflex mount. With rotation lock or lever lock.

MAKfix fixed mount

- . Only for diameter 1" and 30 mm
- . Recoil proof, by means of a recoil lug milled in the solid front ring.
- . Extremely stable.
- . A very low mounted scope is possible with this mount.
- . Especially recommended when the rifle does not have open sights.
- . A very elegant, proportioned mount.
- . This mount is easy to install, and therefore very interesting price-wise.
- . Available in several heights between scope and action, from 11,0 mm to 20,0 mm
- . Available with offset on the front foot suitable for the new shorter scopes.

MAKlick

Extremely stable
Extremely flexible
Extremely low
Extremely simple to mount

1. Vertical adjustment (pivot tension) through adjustable pivot
2. Horizontal adjustment (shot direction) through adjustable lug
3. Lockup by pivot rotation

MAKnetic

The removable assembly for guns without smallest change in the weapon!

The ideal assembly for the connection between the new Aimpoint Micro T-1 and your weapon.

After the great success of our innovative Mount MAKlick, we put another landmark in the history of the assembly technology with MAKnetic.

MAKnetic is the newest development from MAK and connects extremely reliably the red dot sight and guns without smallest change in the weapon.

MAKugel

MAKugel is the latest MAK product for mounting DOCTER Sight on weaver/picatinny rails with absolute stability and return to zero after take off.

MAKcam

The MAKcam is a compact camera system for mounting on a telescopic sight and image recording without impairing the function and handling of the telescopic sight. Thus, the direct targets through the telescopic sight, shooting and video recording is also possible. This is the MAKcam the ideal partner for recording hunting experiences, as well as training in sport and to preserve evidence in official operations. The video or still image recording is done internally. In addition, a Livestream to a computer (e.g. laptop) and external recording is possible.

The MAKcam is available in two versions: 16GB and 32GB storage. The video quality and image size is 720x480 pixels at 30 frames per second. The battery life is 60min. (16GB) or 180min. (32 GB). The milled from a solid 7075 aluminum housing is according to standard IP 67 waterproof to 1m. Thanks to the high-quality coating (Hard Coatiert) are the housing and the mounting Robust and resistant to corrosion. Power is supplied by an integrated lithium polymer battery and can be charged via USB.
